Time doesn’t move faster. It just seems that way.

Your pulse race as fast as the car does. Something you may experience in the Audi S6. Thanks to the 3.0-litre TDI engine with 257 kW and impressive torque of 700 Nm. And thanks to the electric powered compressor that delivers the hallmark S spontaneus drive-off performance. Time doesn’t move faster, but sometimes it flies by.

The fuel consumption and CO₂ emission figures can be found on page 16.

Some of the equipment illustrated or described is optional equipment for which an extra charge is made. Please contact your Audi partner or visit www.audi.com for detailed information about standard and optional equipment.
Breathtaking moments.
Relax and enjoy them.

The driver assist systems help you stay relaxed even when driving fast. This reduces stress and the stress-related lessens your awareness. Today, step from speed and make the drive to the vehicle ahead as well as keep it clear. So there are no surprises and challenges during the way, leaving you to relax and enjoy those breathtaking moments.

The fuel consumption and CO₂ emission figures can be found on page 16. Some of the equipment illustrated or described is optional equipment for which an extra charge is made. Please contact your Audi partner or visit www.audi.com for detailed information about standard and optional equipment.

Please note: The systems work only within system limits and assist the driver. However, the driver remains responsible for driving the vehicle and is required to be attentive at all times.
Special moments. 
Make them sporty.

A deserted beach can provide magical moments. So too can the journey there. When you feel how the quattro permanent all-wheel drive channel the power of the Audi S6 where it's needed – onto the road. When your car can be tailored to your own driving style thanks to Audi drive select with five modes, from sporty to efficient. And when the adaptive air suspension ensures you're always on top form on the road, no matter how fast you drive.

Time for more sportiness. Appreciate the design from any angle.

The Audi S6 comes with a particularly sporty interpretation of the new Audi design language. Its unique character embodies pure emotions, elegant dynamism and futuristic functions. Its sporty roof line and coupé-like silhouette inimitably combine the self-assured upright front end with the flat styling of the rear. A multifaceted look – and unique S character.

01 HD Matrix LED headlights
Tight fit with aluminium struts, S badge
02 Exterior mirror housings in aluminium look
03 S tailgate spoiler
Room for personality.

With a modern-day interpretation.

A cockpit that’s big on comfort. Reflected in the embossed S on the S sport seat with rhombus pattern, brought to life through many innovative details. Thanks to MMI navigation plus with MMI touch response, these include the personal route assist, the predictive efficiency assist and other digital services. Shown on the high-resolution 10.1-inch HD touch display, which lets you conveniently operate the display and control the infotainment functions at the touch of a button. Or even using your voice thanks to the integrated natural language interaction.
Sporty from all sides. Elegant at all times. Plenty of space.

The Audi S6 Avant is the best of the two worlds:

• A high-end company car
• A luxurious family car
• An elegant, athletic vehicle for everyday needs

But in any case a progressive, fully connected car – ready for a new era.

LED rear lights with dynamic light sequencing and dynamic indicator
Tailpipe trims in chrome look
Forged aluminium wheels in 5-twin-spoke V design
**Time for the new Audi S6.**

Exhilarating sportiness, premium comfort, innovative operating concept, the latest-generation driver assist systems and scintillating dynamic design. All in good time. Or now, in the Audi S6 Saloon and the Audi S6 Avant.

### Technical data

**Emission standard EU6**

**Combined (WLTP)**

**WLTP (Proline) values**

**Extra-urban**

**Fuel grade** Sulphur-free diesel

**Performance/consumption**

- **8 % gradient**
- **in kg**

**Gross vehicle weight in kg** 2,590 2,655

**Unladen weight**² in kg 2,030 2,095

**Weights/capacities Saloon Avant**

- **Transmission type** 8-speed tiptronic

**Power transmission**

- **Max. torque in Nm at rpm** 700/2,500–3,100
- **Max. output¹ in kW at rpm** 257/3,850

### Additional information

²  Unladen vehicle weight includes driver (75 kg) and fuel tank 90 % full, calculated in accordance with the current procedures prescribed by law. Since 1 September 2017, certain new vehicles are already being type-approved according to WLTP. The specified fuel consumption and emission data have been determined according to the measurement procedures prescribed by law. Since 1 September 2017, certain new vehicles are already being type-approved according to the WLTP in stages. Owing to the more realistic test conditions, the fuel consumption and CO₂ emissions measured according to the WLTP will, in many cases, be higher than those for measuring fuel consumption and CO₂ emissions. Starting on 1 September 2018, the New European Driving Cycle (NEDC) will be replaced by the WLTP in stages. The new driving cycles with their more realistic driving situations and small size, the fuel consumption and CO₂ emissions values are determined according to the WLTP. The new driving cycles therefore correspond to the real driving situations. For customer information on the differences between the NEDC and WLTP, please visit our website. We are currently still requiring type approval to the NEDC figures. In the case of new vehicles which have been type-approved according to the WLTP, the manufacturer can choose between displaying the NEDC and the WLTP (in brackets) once they become available. Where the NEDC figures have been specified as value ranges, these do not refer to a particular individual vehicle and do not constitute part of the vehicle’s specifications. We reserve the right to make technical modifications. The figures do not include any possible load limit and the top speed will be limited accordingly. Additional equipment and accessories (e.g., attachments, different wheel formats, etc.) may change the relevant vehicle parameters, such as weight, consumption and emissions, and, in conjunction with wind and traffic conditions and road inclines, driving style, may affect expected vehicle and electrical power consumption, emissions and the performance figures for the vehicle.

### Classifications of tyre parameters

- **Type size**
- **Fuel efficiency class**
- **Wet grip class**
- **Sidewall cornering class**
