

**Do not just protect
against the wind:
Windscreens from
Audi Genuine Parts**

Facts you must know:

- › The windshield must always ensure full visibility to the front
- › The windshield is a load-bearing part of the body and contributes to your static. However, stone chip damage can significantly reduce the static
- › The windshield must be able to bear the stress of an opening airbag because the front passenger's airbag rests on it from the inside. During installation, if the windshield is not glued in accordance with the specification, this characteristic can be affected
- › Fine scratches on the windshield, e. g. caused by an ice scraper, dust or sand particles can cause dangerous glare
- › In the case of a high level of wear, the windshield must be replaced so that road safety is still guaranteed

Windscreens from Audi Genuine Parts

- › Are manufactured according to manufacturer specifications and taking into account all series specifications so that the stabilising effect of the windscreens is guaranteed
- › Ensure simple repair procedures, short assembly times, safe handling and reduced repair costs thanks to their optimum tailored fit
- › Provide the original operational and functional stability again after repair
- › Offer a high level of driving comfort through good noise insulation properties and effective protection against UV radiation
- › Are available in different tints and with different coloured strips

- › Can often be repaired simply if hit by a stone chip. If repair is possible (e. g. if the damage is not in the driver's field of vision and is about the size of a EUR 2 coin), it will be carried out by us professionally. The cost is usually covered by comprehensive insurance

Why you must always insist on Genuine Parts

Windscreens from Audi Genuine Parts offer full operational reliability at optimum comfort thanks to:

- › High optical quality
- › Very good noise insulation
- › Effective UV protection
- › High level of precision
- › Coordinated interaction with Audi Genuine aero wipers

I Audi Genuine Parts

- › Are matched to the quality of the components used in the manufacture of the vehicle
- › Ensure coordinated interaction between all vehicle parts
- › Guarantee the highest possible level of safety through outstanding performance and reliability

This is how your Audi stays Genuine.
